

# Precision Sample Cutter

Code: P.301.xxx

## Usage

To prepare paper and board samples for the Elmendorf Tear Test or the Bending Stiffness Test.

## Device description

The durable precision sample cutter base is constructed entirely from metal. Both the upper and lower blades are made from high-quality materials, ensuring clean, accurate cuts and precise samples. Designed as a practical tabletop device, it features multiple safety mechanisms. With a simple push of the lever, samples can be cut out effortlessly. A convenient gap beneath the cutting area allows for quick and easy removal of the sample, while non-slip feet keep the cutter securely in place during use.

easy sample take out

## Available Models

Code	Sample size	Test
P.301.100	50 x 63 mm	Elmendorf
P.301.101	63 x 63 mm	Elmendorf
